

# GROWTH PORTFOLIO

Offered exclusively through Protective Life variable insurance products

## PROTECTIVE LIFE DYNAMIC ALLOCATION SERIES

### Morningstar category

Allocation – 70% to 85% Equity

### Portfolio management

Benjamin Wang, CFA  
 Scott M. Weiner, D. Phil  
 Zoey Zhu, CFA

### Portfolio overview

Inception date	4/7/16
Fund assets	\$46.7 M
Distribution frequency	Semiannually

### Expense ratios (%)

	Gross	Net
	1.15	0.90

Net expense ratios reflect the expense waiver, if any, contractually agreed to through at least May 1, 2024. The contractual waiver may be terminated or modified prior to this date only at the discretion of the Board of Trustees.

Certain expenses waived or reimbursed during the first three years of operation may be recovered within three years of such waiver or reimbursement amount, if the expense ratio falls below certain limits.

### Portfolio description

This global asset allocation portfolio can help investors remove the emotion from investing by following a rules-based asset allocation process. The Portfolio looks to shift equity allocations to and from short-term investments weekly based on defined market signals, with a goal to grow assets over time while mitigating downside risk.

Performance (%)	Q423	1 year	3 year	5 year	10 year	Since inception (4/7/16)
Protective Life Dynamic Allocation Series – Growth Portfolio	8.46	18.34	4.76	4.73	–	6.25
MSCI All Country World Index <sup>SM</sup>	11.03	22.20	5.75	11.72	–	10.34

**Returns quoted are past performance and do not guarantee future results; current performance may be lower or higher. Investment returns and principal value will vary; there may be a gain or loss when shares are sold. For the most recent month-end performance call 800.456.6330.**

### Calendar year returns (%)

	2019	2020	2021	2022	2023
Protective Life Dynamic Allocation Series – Growth Portfolio	12.00	-2.15	20.79	-19.57	18.34
MSCI All Country World Index <sup>TM</sup>	26.60	16.25	18.54	-18.36	22.20

### Asset allocation (%)

	Allocation	Target allocation
U.S. large cap equity	39.92	40.00
U.S. small cap equity	15.56	15.00
U.S. high growth equity	15.31	15.00
UK equity	9.73	10.00
European equity	9.89	10.00
Japan equity	4.85	5.00
Asian equity	4.71	5.00
Short-term investments	0.02	Up to 100.00

Returns include reinvestment of dividends and capital gains. Returns greater than one year are annualized.

Returns do not reflect the deduction of fees, charges or expenses of any insurance product or qualified plan. If applied, returns would have been lower.

**Target Allocation** to the respective asset class is a percentage of the Portfolio's total assets plus, with respect to the equity classes, any remainder in cash equivalents.

## Holdings (%)

Vanguard S&P 500 ETF	39.92

**Janus Henderson**  
INVESTORS

Index represents the MSCI All Country World Index<sup>SM</sup>.

**Investing involves market risk and it is possible to lose money by investing.** Investment return and value will fluctuate in response to issuer, political, market and economic developments, which can affect a single issuer, issuers within an industry, economic sector or geographic region, or the market as a whole.

Performance of the Dynamic Allocation Series Portfolios depends on that of the underlying funds. They are subject to risk with respect to the aggregation of holdings of underlying funds which may result in increased volatility as a result of indirectly having concentrated assets in a particular industry, geographical sector, or single company.

No assurance can be given that the investment strategy will be successful under all or any market conditions. Janus Henderson Investors US LLC has limited prior experience using the proprietary methodology co-developed with Protective Life Insurance Company. Although it is designed to achieve the Portfolios' investment objectives, there is no guarantee that it will achieve the desired results. Because Janus Henderson is the adviser to the Portfolio and to certain affiliated funds that may be held within the Portfolio, it is subject to certain potential conflicts of interest.

Index performance does not reflect the expenses of managing a portfolio as an index is unmanaged and not available for direct investment.

**MSCI All Country World Index<sup>SM</sup>** reflects the equity market performance of global developed and emerging markets. **Alpha** compares risk-adjusted performance relative to an index. Positive alpha means outperformance on a risk-adjusted basis. **Beta** measures the volatility of a security or portfolio relative to an index. Less than one means lower volatility than the index; more than one means greater volatility.

**R-squared (R<sup>2</sup>)** measures the relationship between portfolio and index performance on a scale of 0.00 (0%) to 1.00 (100%). A higher R<sup>2</sup> indicates more of the portfolio's performance is affected by market movements and vice versa. **Standard deviation** measures historical volatility. Higher standard deviation implies greater volatility. **Sharpe ratio** measures risk-adjusted performance using excess returns versus the "risk-free" rate and the volatility of those returns. A higher ratio means better return per unit of risk.

**Please consider the charges, risks, expenses and investment objectives carefully before investing.
