Janus Henderson

Global Adaptive Multi-Asset Fund Class H2 USD ISIN: IE00BZ77D437

A sub-fund of Janus Henderson Capital Funds plc, an Irish Investment Company (IIC) managed by Janus Henderson Investors Europe S.A.
Fund Currency: USD Share Class Currency: USD

Objective and investment policy

Objective

The Fund aims to provide a return, from a combination of capital growth and income over the long term.

Performance target: To outperform the 60% MSCI ACWI + 40% Bloomberg Global Aggregate Bond Index by 1% per annum, before the deduction of charges, over any 5 year period.

Investment policy

The Fund invests in a globally diverse portfolio of company shares (also known as equities) and equity-related investments, bonds of any type, commodities (such as gold, oil and agricultural produce), cash and money market instruments. The Fund may gain its exposure to these assets either directly, via other funds (collective investment schemes, including exchange traded funds) and investment trusts/companies, or by using derivatives (complex financial instruments). The Sub-Investment Adviser has flexibility to shift allocations between different asset classes and may invest up to 100% of its assets in any of these classes, depending on prevailing market conditions. The Fund has no specific geographical or industrial focus and may invest in developing countries.

The Sub-Investment Adviser may use derivatives (complex financial instruments), including total return swaps, with the aim of making investment gains in line with the Fund's objective, to reduce risk or to manage the Fund more efficiently.

The Fund is actively managed with reference to the 60% MSCI ACWI + 40% Bloomberg Global Aggregate Bond Index, which is broadly representative of the assets in which it may invest, as this forms the basis of the Fund's performance target. The Sub-Investment Adviser has a high degree of freedom to choose individual investments for the Fund.

Strategy

The Sub-Investment Adviser seeks returns by allocating across global equity and global bond markets, while attempting to reduce the risk of significant loss. The investment process uses proprietary technology to assess the future probability of extreme market moves, both to the upside and downside.

Distribution policy This share class accumulates income which is retained within the price of the share class.

Recommendation This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

You can buy, sell or switch shares in the Fund on any business day, as defined in the Company's Prospectus.

Risk and reward profile

The value of an investment and any income from it can go up or down. When you sell your shares they may be worth less than you paid for them.

The rating above is based on the historic volatility of the share class. Historic data may not be a reliable indication of the future risk profile of the Fund. The rating is not guaranteed and may change over time.

The share class appears at 5 out of 7. Share classes in higher categories have shown greater and/or more frequent variations in Net Asset Value in the past five years than those in lower categories. The lowest category does not mean risk free.

Other material risks not captured by the rating:

Equities Shares/Units can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.

Credit Risk An issuer of a bond (or money market instrument) may become unable or unwilling to pay interest or repay capital to the Fund. If this happens or the market perceives this may happen, the value of the bond will fall.

Interest Rates When interest rates rise (or fall), the prices of different securities will be affected differently. In particular, bond values generally fall when interest rates rise (or are expected to rise). This risk is typically greater the longer the maturity of a bond investment.

Emerging Markets Emerging markets expose the Fund to higher volatility and greater risk of loss than developed markets; they are susceptible to adverse political and economic events, and may be less well regulated with less robust custody and settlement procedures.

Concentration This Fund may have a particularly concentrated portfolio relative to its investment universe or other funds in its sector. An adverse event impacting even a small number of holdings could create significant volatility or losses for the Fund.

Derivatives and Leverage The Fund may use derivatives to help achieve its investment objective. This can result in leverage (higher levels of debt), which can magnify an investment outcome. Gains or losses to the Fund may therefore be greater than the cost of the derivative. Derivatives also introduce other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

Exchange Rates If the Fund holds assets in currencies other than the base currency of the Fund, or you invest in a share/unit class of a different currency to the Fund (unless hedged, i.e. mitigated by taking an offsetting position in a related security), the value of your investment may be impacted by changes in exchange rates.

Liquidity Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

Counterparty Risk and Operational Risk The Fund could lose money if a counterparty with which the Fund trades becomes unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.

For more information please see the Company's Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially to those shown in this document.

One-off charges taken before or after you invest*

Entry Charge	0.00%
Exit Charge	0.00%

* The charges shown are maximum figures. In some cases you may pay less.

Past performance

■ Class H2 USD (Net of Charges)

■ 60% MSCI All Country World Index / 40% Bloomberg Global Aggregate Bond Index +1%*

Charges taken from the Fund over a year

Ongoing Charges	0.95%
-----------------	-------

The ongoing charges are based on actual annualised expenses for the period ending 20 December 2023. Ongoing charges may vary from year to year. The figure for ongoing charges excludes portfolio transaction costs, except in the case of an initial charge paid by the Fund when buying shares or units in another Fund.

For more information about Charges please see the Company's Prospectus.

*Warning: From 18 February 2020, the Fund's benchmark changed from 3 Month LIBOR to 60% MSCI All Country World Index / 40% Bloomberg Barclays Global Aggregate Bond Index. Past performance before 18 February 2020 is shown for the Fund's previous benchmark.

The past performance is calculated in USD.

The Fund and the share class were launched in April 2016.

Past performance does not predict future returns.

The past performance takes into account all charges except one-off charges. Please note that while the Fund aims to achieve its performance target before the deduction of charges, the chart and table illustrate the actual performance of the share class after the deduction of charges.

The Fund does not aim to track the performance of the benchmark.
