### Objective and investment policy

The Fund aims to provide an income in excess of the income generated by the MSCI Europe Net Return Index with the potential for capital growth over the long term (5 years or more).

The Fund invests at least 80% of its assets in shares (equities) and equity-related securities of companies, of any size, in any industry, in Europe (including UK). Companies will have their registered office in or do most of their business (directly or through subsidiaries) in this region.

The Fund is actively managed with reference to the MSCI Europe Net Return Index, which is broadly representative of the companies in which it may invest, as this forms the basis of the Fund's income target and the level above which performance fees may be charged (if applicable). The investment manager has discretion to choose investments for the Fund with weightings different to the index or not in the index, but at times the Fund may hold investments similar to the index.

## What are the risks specific to this fund?

- The Fund could lose money if a counterparty with which it trades becomes unwilling or unable to meet its obligations to the Fund.
- If a Fund has a high exposure to a particular country or geographical region it carries a higher level of risk than a Fund which is more broadly diversified.
- The Fund may use derivatives with the aim of reducing risk or managing the portfolio more efficiently. However this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations.
- If the Fund holds assets in currencies other than the base currency of the Fund or you invest in a share class of a different currency to the Fund (unless 'hedged'), the value of your investment may be impacted by changes in exchange rates.
- Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

## General risks

- Past performance is not a guide to future performance.
- The value of an investment and the income from it can fall as well as rise and you may not get back the amount originally invested.
- Tax assumptions and reliefs depend upon an investor's particular circumstances and may be subject to change.
