KEY RISKS	
<p><b>WHAT ARE THE KEY RISKS OF THIS INVESTMENT?</b></p> <p>There is no guarantee that investors will get back the invested amount given that the value of investments and its dividends are subject to market conditions and therefore may go up as well as down. These risk factors may cause you to lose some or all of your investment:</p>	<p>Refer to "Risk Factors" in the Singapore Prospectus and "Investment and Risk Considerations" in the Luxembourg Prospectus for further information on risks of the product.</p>
Market and Credit Risks	
<ul style="list-style-type: none"> <li>▪ <b>Market risks in Greater China markets.</b> The value of the investments in the Fund may go up or down due to changing economic, political, regulatory, social development or market conditions that impact the share price of the companies that the Fund invests in.</li> <li>▪ <b>Market risks in Emerging markets.</b> Emerging markets are less established and more prone to political events than developed markets, such as government intervention, remittance of funds or quota restrictions, unorthodox custody practices, unproven trading programs and uncertain legal rights. This can mean both higher volatility and a greater risk of loss to the fund than investing in more developed markets.</li> <li>▪ <b>Currency.</b> Assets of the Fund may be denominated in a currency other than the Base Currency of the Fund. Changes in the exchange rate between the Base Currency and the currency of the asset may cause the value of your investment and any income from it to rise or fall.</li> <li>▪ <b>You have greater exposure to market risks as this is an equity fund.</b> Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.</li> </ul>	
Liquidity Risks	
<ul style="list-style-type: none"> <li>▪ <b>The Fund is not listed and you can redeem only on Dealing Days.</b> There is no secondary market for the Fund. All redemption requests should be made to the Investment Manager.</li> </ul>	

<ul style="list-style-type: none"> <li>▪ <b>Flexibility in redemption may be restricted.</b> The Fund may, under the Articles of Incorporation, defer the redemptions or suspend the determination of the net asset value of the shares of the Fund in certain circumstances.</li> <li>▪ <b>Difficulty in realising the value of investments readily may delay payment of redemption proceeds.</b> Any security could become hard to value or to sell at a desired time and price, increasing the risk of investment losses.</li> </ul>	
Product-Specific Risks	
<ul style="list-style-type: none"> <li>▪ <b>China A Shares and Stock Connect Programs.</b> The Fund may invest in China A shares via a Stock Connect program. This may introduce additional risks including operational, regulatory, liquidity and settlement risks.</li> <li>▪ <b>Derivatives.</b> The Fund may use derivatives with the aim of reducing risk or managing the portfolio more efficiently. However this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations.</li> <li>▪ <b>Concentration.</b> Investing in a limited number of issuers, industries, type of securities or within a limited geographical can be riskier than investing more broadly making it more susceptible to any single economic market, political or regulatory occurrence. The Fund's value may fall where the area of concentration is heavily affected by an adverse event.</li> </ul>
