<p><b>KEY RISKS</b></p>	
<p><b>WHAT ARE THE KEY RISKS OF THIS INVESTMENT?</b></p> <p>There is no guarantee that investors will get back the invested amount given that the value of investments and its dividends are subject to market conditions and therefore may go up as well as down. These risk factors may cause you to lose some or all of your investment:</p>	<p>Refer to “Risk Factors” in the Singapore Prospectus and “Investment and Risk Considerations” in the Luxembourg Prospectus for further information on risks of the product.</p>
<p><b>Market and Credit Risks</b></p>	
<ul style="list-style-type: none"> <li>▪ <b>You are exposed to the market risks in North American markets.</b> The value of the investments in the Fund may go up or down due to changing economic, political, regulatory, social development or market conditions that impact the share price of the companies that the Fund invests in.</li> <li>▪ <b>You are exposed to currency risk.</b> Assets of the Fund may be denominated in a currency other than the Base Currency of the Fund. Changes in the exchange rate between the Base Currency and the currency of the asset may cause the value of your investment and any income from it to rise or fall.</li> <li>▪ <b>You have greater exposure to market risks as this is an equity fund.</b> Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.</li> </ul>	
<p><b>Liquidity Risks</b></p>	
<ul style="list-style-type: none"> <li>▪ <b>The Fund is not listed and you can redeem only on Dealing Days.</b> There is no secondary market for the Fund. All redemption requests should be made to the Investment Manager.</li> <li>▪ <b>Flexibility in redemption may be restricted.</b> The Fund may, under the Articles of Incorporation, defer the redemptions or suspend the determination of the net asset value of the shares of the Fund in certain circumstances.</li> <li>▪ <b>Difficulty in realising the value of investments readily may delay payment of redemption proceeds.</b> Any security could become hard to value or to sell at a desired time and price, increasing the risk of investment losses.</li> </ul>	
<p><b>Product-Specific Risks</b></p>	

<ul style="list-style-type: none"> <li>▪ <b>You are exposed to derivatives risks.</b> Derivatives use exposes the Fund to risks different from and potentially greater than, the risks associated with investing directly in securities and may therefore result in additional loss, which could be significantly greater than the cost of the derivative.</li> <li>▪ <b>You are exposed to OTC market risks.</b> Investments in OTC markets are speculative and relatively illiquid, hence are subject to high volatility. OTC investment's valuation may be difficult to obtain as reliable information of the issuers and the risks associated to the issuers' business is not publicly available. OTC derivatives have the risk of incorrectly valuing or pricing and they may not fully correlate with the underlying assets. Investment in OTC markets carries the risk that a counterparty may default on its obligations. In the event of a bankruptcy or insolvency of a counterparty, the Fund could experience delays in liquidating the position and significant losses.</li> <li>▪ <b>You are exposed to hedging risks.</b> Any attempts to reduce certain risks may not work as intended. Any measures that the Fund takes that are designed to offset specific risks may work imperfectly, may not be feasible at times, or may fail completely.</li> <li>▪ <b>You are exposed to securities lending risks.</b> The Fund may lend its portfolio securities to financial institutions and expose to the risk that the borrower defaults and fails to return the borrowed securities. The loaned securities may be secured by cash collateral that may be reinvested and may incur losses or underperforms relative to other investment options. Parties in a securities lending transaction may fail to comply, either inadvertently or purposely, with either contractual covenants or laws and regulations governing securities lending activities. There are also operational issues including market or exchange problems, miscommunication between lenders and borrowers regarding the terms of transactions between them, failed reconciliations, missed record dates, incorrect tax entitlements, etc.</li> </ul>
