The Fund may use derivative instruments (such as futures, forwards, options and warrants) to generate additional income for the Fund, to reduce risk and to manage the Fund more efficiently. The Fund may invest in companies of any size, including smaller capitalisation companies, in any industry. The Fund is actively managed with reference to the MSCI All Countries (AC) Asia Pacific Ex Japan High Dividend Yield Index as this forms the basis of the Fund's income target. KEY RISKS	
WHAT ARE THE KEY RISKS OF THIS INVESTMENT? <p>There is no guarantee that investors will get back the invested amount given that the value of investments and its dividends are subject to market conditions and therefore may go up as well as down. These risk factors may cause you to lose some or all of your investment:</p>	Refer to "Risk Factors" in the Singapore Prospectus and the "Investment and Risk Considerations" in the Luxembourg Prospectus for further information on risks of the product.
Market and Credit Risks	
<ul style="list-style-type: none"> Market risks in Asian markets. The value of the investments in the Fund may go up or down due to changing economic, political, regulatory, social development or market conditions that impact the share price of the companies that the Fund invests in. Market risks in emerging markets. Emerging markets expose the Fund to higher volatility and greater risk of loss than developed markets; they are susceptible to adverse political and economic events and may be less well-regulated with less robust custody and settlement procedures. Currency. Assets of the Fund may be denominated in a currency other than the Base Currency of the Fund. Changes in the exchange rate between the 	

<p>Base Currency and the currency of the asset may cause the value of your investment and any income from it to rise or fall.</p> <ul style="list-style-type: none"> ▪ You have greater exposure to market risks as this is an equity fund. Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall. 	
Liquidity Risks	
<ul style="list-style-type: none"> ▪ The Fund is not listed and you can redeem only on Dealing Days. There is no secondary market for the Fund. All redemption requests should be made to the Investment Manager. ▪ Flexibility in redemption may be restricted. The Fund may, under the Articles of Incorporation, defer the redemptions or suspend the determination of the net asset value of the shares of the Fund in certain circumstances. ▪ Difficulty in realising the value of investments readily may delay payment of redemption proceeds. Any security could become hard to value or to sell at a desired time and price, increasing the risk of investment losses. 	
Product-Specific Risks	
<ul style="list-style-type: none"> ▪ Derivatives. The Fund may use derivatives with the aim of reducing risk or managing the portfolio more efficiently. However this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations. ▪ Concentration. This Fund may have a particularly concentrated portfolio relative to its investment universe or other funds in its sector, making it more susceptible to any single economic market, political or regulatory occurrence. An adverse event impacting even a small number of holdings could create significant volatility or losses for the Fund. ▪ Currency hedging. When a currency hedged share class of the Fund, seeks to mitigate (hedge) exchange rate movements of a currency relative to the Fund's base currency, the hedging strategy itself may create a positive or negative impact to the value of the Fund due to differences in short-term interest rates between the currencies. ▪ Capital growth. In addition to income, the sub-class 4 shares and sub-class 5 shares may distribute realised and unrealised capital gains and original capital invested. Fees, charges and expenses are also deducted from capital. Both factors may result in capital erosion and reduced potential for capital growth. Investors should also note that these distributions may be treated (and taxable) as income depending on local tax legislation.
