

# INSTITUTIONAL OVERSEAS BOND FUND

**A Inc ISIN GB0007673055**

## Investment objective

The Fund aims to provide an income with the potential for capital growth over the long term. Performance target: To outperform the JP Morgan Global Government Bond Ex UK Index by 1% per annum, before the deduction of charges, over any 5 year period.

For the fund's investment policy, refer to the Additional fund information on page 3.

**Past performance does not predict future returns.**

## Fund details

<b>Inception date</b>	25 June 1993
<b>Total net assets</b>	194.11m
<b>Asset class</b>	Fixed Income
<b>Domicile</b>	United Kingdom
<b>Structure</b>	OEIC
<b>Base currency</b>	GBP
<b>Index</b>	JP Morgan Global Government Bond (Ex UK) Index
<b>Peer group</b>	IA Global Government Bond

For benchmark/usage description, refer to Additional fund information on page 3.

## Share class information

<b>Inception date</b>	08 February 1998
<b>Distribution type</b>	Income Gross
<b>Distribution frequency</b>	Quarterly
<b>Distribution yield</b>	1.50%
<b>Underlying yield</b>	1.50%
<b>Currency</b>	GBP
<b>Minimum initial investment</b>	1,000

The Distribution and Underlying Yields are based on a snapshot of the portfolio on that day. The yield does not include any preliminary charge and investors may be subject to tax on distributions.

## Portfolio management

<b>Helen Anthony, CFA</b>	Manager since 2022
<b>Arjun Bhandari, CFA</b>	Manager since 2023

### Characteristics

Number of holdings: Debt issues	59
Duration (years)	7.57
Weighted average life (years)	8.85
Yield to worst (%)	2.98

### Credit quality of fixed income holdings (%)

	Fund
AAA	10.67
AA	52.83
A	4.00
BBB	12.48
Not Rated	17.40

Bond credit quality ratings provided by Janus Henderson Investors is based on the average of ratings from Moody's, Standard & Poor's and Fitch where all three agencies have provided a rating. If only two agencies rate a security, the average is on those. If only one agency rates a security, that rating is used. Ratings are measured on a scale that ranges from AAA (highest) to CCC (lowest). Swaps, Options, Cash and Bond Futures are separately grouped.

### Maturity of fixed income holdings (%)

	Fund
0-5 years	45.74
5-10 years	33.19
10-15 years	2.10
15-20 years	7.92
20-25 years	2.89
25-30 years	4.11
30+ years	1.42

### Top holdings (%)

	Fund
United States Treasury Note 2.50% 2027	9.40
United States Treasury Note 2.125% 2026	5.88
Japan Government Ten Year Bond 0.20% 2032	5.58
United States Treasury Note 2.75% 2032	4.38
Japan Government Two Year Bond 0.005% 2024	4.04
Italy Buoni Poliennali Del Tesoro 2.50% 2024	3.97
United States Treasury Note 0.25% 2025	3.86
United States Treasury Note 3.875% 2040	3.16
United States Treasury Note 4.125% 2025	3.13
French Republic Government Bond OAT 1.75% 2024	2.90
<b>Total</b>	<b>46.32</b>

References made to individual securities should not constitute or form part of any offer or solicitation to issue, securities mentioned in the report.

### Top sectors (%)

	Fund
Government	97.38
Cash and Derivatives	2.62

### Codes

<b>ISIN</b>	GB0007673055
<b>Bloomberg</b>	HENOSII
<b>SEDOL</b>	0767305
<b>WKN</b>	797066
<b>Valoren</b>	1140109

### Fees & charges (%)

<b>Annual management charge (AMC)</b>	0.75
<b>Ongoing charge (OCF)</b>	0.93

All ongoing charges stated are as per latest published report and accounts.

Fund charges will impact the value of your investment. In particular, the ongoing charges applicable to each fund will dilute investment performance, particularly over time. For further explanation of charges please visit our Fund Charges page at [www.janushenderson.com](http://www.janushenderson.com).

Under some circumstances initial charges may apply. Please refer to the Prospectus for more details.

## Additional fund information

Tax assumptions and reliefs depend upon an investor's particular circumstances and may be subject to change. Please note the performance target is to be achieved over a specific annualised time period. Refer to the performance target wording within the objective. From 29 January 2023 Andrew Mulliner no longer manages this fund. From 12 June 2023 Arjun Bhandari, now co-manages this fund. Fund size at 12pm on last business day of month. Please note: due to rounding the figures in the holdings breakdowns may not add up to 100%. Performance for the share class is calculated at 12pm and performance of the index is calculated as at close of business. Note that any differences among portfolio securities currencies, share class currencies and costs to be paid or represented in currencies other than your home currency will expose you to currency risk. Costs and returns may increase or decrease as a result of currency and exchange rate fluctuations. All credit, country and sector breakdowns relate to end of day trading positions. The month-end duration of the fund (in years) is shown on page 2. Duration measures the sensitivity of a bond fund to interest rate changes; the larger the figure, the more sensitive is the bond fund to a movement in interest rates. Investment into the fund will acquire units/shares of the fund itself and not the underlying assets owned by the fund. Cash balances and exposures are based on settled and unsettled trades as at the reporting date. The JP Morgan Global Government Bond (Ex UK) Index is a measure of the combined performance of bonds issued by governments (excluding the UK). It forms the basis of the Fund's performance target and provides a useful comparison against which the Fund's performance can be assessed over time. The Investment Association (IA) groups funds with similar geographic and/or investment remit into sectors. The Fund's ranking within the sector (as calculated by a number of data providers) can be a useful performance comparison against other funds with similar aims.

### Investment policy

The Fund invests at least 80% of its assets in overseas (non-UK) bonds of any quality, including high yield (non-investment grade) bonds, issued by governments, public authorities and international organisations. The Fund may also hold other assets including bonds of other types from any issuer and cash. The Investment Manager may use derivatives (complex financial instruments) to reduce risk or to manage the Fund more efficiently. The Fund is actively managed with reference to the JP Morgan Global Government Bond Ex UK Index, which is broadly representative of the bonds in which it may invest, as this forms the basis of the Fund's performance target. The Investment Manager has discretion to choose investments for the Fund with weightings different to the index or not in the index. As an additional means of assessing the performance of the Fund, the IA Global Government Bond sector average, which is based on a peer group of broadly similar funds, may also provide a useful comparator.

### Investment strategy

The Investment Manager seeks to provide a return above that of the benchmark through investments in fixed and floating rate fixed income securities in any part of the world, except the UK. The managers invest primarily in bonds issued by governments, public authorities and international organisations and combine asset allocation views and macroeconomic research to seek out investment opportunities. Fixed income derivative strategies are also used to enhance returns and/or manage risk.

### Fund specific risks

When the Fund, or a share/unit class, seeks to mitigate exchange rate movements of a currency relative to the base currency (hedge), the hedging strategy itself may positively or negatively impact the value of the Fund due to differences in short-term interest rates between the currencies. The Fund could lose money if a counterparty with which the Fund trades becomes unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider. An issuer of a bond (or money market instrument) may become unable or unwilling to pay interest or repay capital to the Fund. If this happens or the market perceives this may happen, the value of the bond will fall. When interest rates rise (or fall), the prices of different securities will be affected differently. In particular, bond values generally fall when interest rates rise (or are expected to rise). This risk is typically greater the longer the maturity of a bond investment. Emerging markets expose the Fund to higher volatility and greater risk of loss than developed markets; they are susceptible to adverse political and economic events, and may be less well regulated with less robust custody and settlement procedures. If a Fund has a high exposure to a particular country or geographical region it carries a higher level of risk than a Fund which is more broadly diversified. The Fund may use derivatives with the aim of reducing risk or managing the portfolio more efficiently. However this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations. If the Fund holds assets in currencies other than the base currency of the Fund, or you invest in a share/unit class of a different currency to the Fund (unless hedged, i.e. mitigated by taking an offsetting position in a related security), the value of your investment may be impacted by changes in exchange rates. Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

### Source for fund ratings/awards

Overall Morningstar Rating™ is shown for Janus Henderson share classes achieving a rating of 4 or 5.

## Glossary

### Discount

When the market price of a security is thought to be less than its underlying value, it is said to be 'trading at a discount'. Within investment trusts, this is the amount by which the price per share of an investment trust is lower than the value of its underlying net asset value. The opposite of trading at a premium.

### Distribution Yield

The Distribution Yield reflects the amounts that may be expected to be distributed over the next 12 months as a percentage of the mid-market share price of the fund at the date shown.

### Duration

How far a fixed income security or portfolio is sensitive to a change in interest rates, measured in terms of the weighted average of all the security/portfolio's remaining cash flows (both coupons and principal). It is expressed as a number of years. The larger the figure, the more sensitive it is to a movement in interest rates. 'Going short duration' refers to reducing the average duration of a portfolio. Alternatively, 'going long duration' refers to extending a portfolio's average duration.

### Future

A contract between two parties to buy or sell a tradable asset, such as shares, bonds, commodities or currencies, at a specified future date at a price agreed today. A future is a form of derivative.

### Option

A derivative instrument where one party pays/receives the total return of the underlying asset or market index, in exchange for payments typically linked to LIBOR.

### Underlying Yield

The Underlying Yield reflects the annualised income net of expenses of the fund (calculated in accordance with relevant accounting standards) as a percentage of the mid-market share price of the fund at the date shown.

### Weighted Average Life (WAL)

The average time taken (in years) for the principal to be repaid for securitised assets, or the probable time to maturity for non-securitised assets. Securitised assets, also known as 'asset backed' securities, represent a pool of other interest bearing assets such as loans and mortgages. The value is based on the cash flows of the underlying assets.

### Yield to worst

If a bond has special features, such as a call (ie, the issuer can call the bond back at a date specified in advance), the yield to worst is the lowest yield the bond can achieve provided the issuer does not default.
