KEY INVESTOR INFORMATION

This document provides you with Key Investor Information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Janus Henderson

Core 6 Income & Growth Fund Class I Inc ISIN: GB00B94SCD93

A sub-fund of Janus Henderson Multi-Manager Investment OEIC, a UK OEIC managed by Janus Henderson Fund Management UK Limited.
Fund Currency: GBP Share Class Currency: GBP

Objective and investment policy

Objective

To provide a sustainable income return with the prospect for capital growth whilst maintaining a moderately high level of volatility (variation of returns) over the medium to long term (5 years or more). Maintaining the volatility of the Fund within defined limits, while not guaranteed, is prioritised over the generation of income.

Investment policy

The Fund invests in Collective Investment Schemes (other funds including those managed by Janus Henderson and Exchange Traded Funds) to provide diversified global exposure to a range of assets including bonds issued by companies and governments, company shares (equities), and to a lesser extent, alternative assets such as property and commodities.

The Fund may invest directly in other assets including shares (equities), bonds, cash and money market instruments.

The Investment Manager may use derivatives (complex financial instruments) with the aim of making investment gains in line with the Fund's objective, to reduce risk or to manage the Fund more efficiently.

The Fund is actively managed with reference to Distribution Technology (an independent risk rating body) risk profile level '6' as referenced in the Fund's name, as this relates to the target risk profile of the Fund. The Investment Manager has a high degree of freedom to choose individual investments for the Fund.

Strategy

The Investment Manager believes that by building a genuinely multi asset portfolio with an active approach to asset allocation and instrument selection, it is possible

to generate an attractive combination of risk and return characteristics, while targeting the generation of regular natural income. This philosophy is put to work for this fund, which seeks to generate attractive total returns while remaining within clearly-defined risk parameters. The investment process combines both internal and external research to construct a view on the outlook for different asset classes, an assessment of the most suitable income generating assets to meet the Fund's objective, and a robust risk management framework.

Distribution policy The Fund offers accumulation shares (shares in which net income is retained within the price) and income shares (shares in which net income may be paid out to investors).

Recommendation Designed to be bought in conjunction with an attitude to risk tool as part of the financial advice process and therefore designed to be bought by advised clients only. This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

You can buy, sell or switch shares in the Fund on any dealing day and according to certain restrictions, both defined in detail in the Company's Prospectus.

For an explanation of some of the terms used in this document, please visit the glossary on our website at www.janushenderson.com.

Risk and reward profile

The value of an investment and any income from it can go up or down. When you sell your shares they may be worth less than you paid for them.

The rating above is based on the historic volatility of the share class. Historic data may not be a reliable indication of the future risk profile of the Fund. The rating is not guaranteed and may change over time.

The share class appears at 6 out of 7. Share classes in higher categories have shown greater and/or more frequent variations in Net Asset Value in the past five years than those in lower categories. The lowest category does not mean risk free.

The Fund targets a risk profile of 6 as calculated by Distribution Technology (DT), which is an independent provider of risk profiling. DT profiles funds on a scale of 1-10 and takes into consideration risk targets and other factors as well as past data. This is different to the "Risk and Reward Profile" scale above, which is a regulated standard based only on past data. For further information on the DT risk profile please contact us.

Other material risks not captured by the rating:

Equities Shares/Units can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.

Underlying Funds The Fund invests in other funds (including exchange-traded funds and investment trusts/companies). This may introduce more risky

assets, derivative usage and other risks associated with the underlying funds, as well as contributing to a higher level of ongoing charges.

Derivatives and Leverage The Fund may use derivatives to help achieve its investment objective. This can result in leverage (higher levels of debt), which can magnify an investment outcome. Gains or losses to the Fund may therefore be greater than the cost of the derivative. Derivatives also introduce other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

Exchange Rates If the Fund holds assets in currencies other than the base currency of the Fund, or you invest in a share/unit class of a different currency to the Fund (unless hedged, i.e. mitigated by taking an offsetting position in a related security), the value of your investment may be impacted by changes in exchange rates.

Liquidity Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

Volatility Parameters The Fund aims to stay within predetermined volatility parameters over a rolling period of at least 5 years. However, the Fund may move outside these parameters if considered beneficial to investment performance or with the aim of preserving capital. Managing volatility will be prioritised over income generation.

Charges to Capital Some or all of the ongoing charges may be taken from capital, which may erode capital or reduce potential for capital growth.

Counterparty Risk and Operational Risk The Fund could lose money if a counterparty with which the Fund trades becomes unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.

For more information please see the Company's Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially to those shown in this document.

One-off charges taken before or after you invest*

Entry Charge	0.00%
Exit Charge	0.00%**

* The charges shown are maximum figures. In some cases you may pay less.

** Subject to a charge of up to 3.00% where the Manager suspects excessive trading by an investor (and specifically on subscriptions held for less than 90 days).

Past performance

Charges taken from the Fund over a year

Ongoing Charges	0.71%
-----------------	-------

Following recent changes to the GAC ("General Administration Charge"), an estimated OCF has been calculated which is more indicative of future costs.

The figure for ongoing charges excludes portfolio transaction costs, except in the case of an initial charge paid by the Fund when buying shares or units in another Fund.

For more information about Charges please see the Company's Prospectus.

The past performance is calculated in GBP.

The Fund and the share class were launched in May 2013.

Past performance does not predict future returns.

The past performance takes into account all charges except one-off charges.

Practical information

Depository: NatWest Trustee and Depository Services Limited.

To obtain more information: This Key Investor Information Document may not contain all the information you need.

For the last published price of shares in the Fund or any additional information on the Fund, or to obtain the Company's prospectus or the annual/semi-annual report, please visit www.janushenderson.com. Documents are available free of charge in English and certain other languages.
