

INTECH GLOBAL INCOME MANAGED VOLATILITY FUND

Class A\$acc ISIN: IE00B7GPM128

Janus Henderson
INVESTORS

A sub fund of Janus Henderson Capital Funds plc

Objectives and Investment Policy

The Fund aims for growth on your investment over time.

The INTECH investment process uses mathematical formulae to construct the Fund's portfolio.

The Fund invests at least 80% of its value in equities (shares) and equity related securities (for example, securities that are linked to the performance of a single equity or an equity index) of companies located anywhere in the world which at the time of investment are at least equal in size to a company in the MSCI High Dividend Yield Index. The Fund has no specific industry focus.

The Fund may invest in companies of any size, including small capitalisation securities (smaller companies).

The Fund pursues its objective by constructing a portfolio which seeks to outperform the MSCI World High Dividend Yield Index, with the additional benefit that it may provide less volatility than that of the Index.

The Fund may invest in other types of eligible investments which are disclosed in the Prospectus.

You may sell your shares generally daily (i.e. on a business day for the Fund).

This share class does not pay you an income but instead reinvests it to grow your capital.

Risk and Reward Profile

The category is calculated based on historical data and is based on price movements in the share class (volatility), and may not be a reliable indicator of future risk. The risk category shown is not guaranteed and may change over time.

The lowest category does not mean the investment is risk-free.

This share class is in category 5 because of rises and falls in its value in the past.

The risk category does not take into account the following risks of investing in this share class:

Investment Risk: the value of investments held in the Fund and the income from them may rise or fall. The Fund may not achieve its investment objectives.

Proprietary Trading Model Risk: the Fund uses mathematical formulae to select investments. There is a risk that the processes used to invest in shares with higher volatility and low price-correlation may not achieve positive returns or outperform.

For a more detailed explanation of risks, please refer to the "Risk Factors and Special Considerations" section of the Prospectus.

Charges

These charges are used to pay the costs of running the Fund, including the costs of marketing and distributing. Overall, they reduce the growth of your investment.

One-off charges taken before or after you invest

Entry charge	5.00 %
--------------	--------

Exit charge	None
-------------	------

This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out.

Charges taken from the Fund over a year

Ongoing charge	1.44 %
----------------	--------

Charges taken from the Fund under specific conditions

Performance fee	None
-----------------	------

Switching charge	None
------------------	------

The charges shown are the maximum figures. In some cases you might pay less. You can find out your actual charges from your financial adviser.

The ongoing charge is based on the previous year's expenses for the year ending December 2017. This figure excludes portfolio transaction costs and may vary from year to year. You can find out more details about the charges by looking at the Fees and Expenses section of the Fund's prospectus.

Past Performance

Class A\$acc

Past performance is not a reliable guide of future performance.

Past performance does not take into account any entry, exit or switching charges but does take into account the ongoing charge, as shown in the Charges section.

The performance of the class is calculated in USD.

The Fund launched on 28 February 2013. This class started to issue shares on 28 March 2013.
