Janus Henderson INVESTORS

A sub fund of Janus Henderson Capital Funds plc

Objectives and Investment Policy

The Fund aims for growth on your investment over time. The Fund focuses on investments in the shares of companies domiciled or having operations in, or that derive significant amount of their income or profits in western, central and eastern Europe (EU and non-EU member countries), including Turkey.

The Fund invests in companies which typically have a strong competitive position and improving earnings.

The Fund has no specific industry focus. The Fund may invest in companies of any size, including small capitalisation securities (smaller companies) and may also invest in markets in countries that are still developing.

The Fund may also invest to a lesser extent in non-European companies and issuers.

The Fund may use financial derivatives (complex financial instruments) with the aim of risk or cost reduction within the portfolio. Derivatives may also be used to generate additional returns or income for the Fund.

The Fund may invest in other types of eligible investments which are disclosed in the Prospectus.

You may sell your shares generally daily (i.e. on a business day for the Fund).

This share class does not pay you an income but instead reinvests it to grow your capital.

Risk and Reward Profile

Lower risk — Higher risk

Typically lower rewards — Typically higher rewards

1	2	3	4	**5**	6	7

The category is calculated based on historical data and is based on price movements in the share class (volatility), and may not be a reliable indicator of future risk. The risk category shown is not guaranteed and may change over time.

The lowest category does not mean the investment is risk-free.

This share class is in category 5 because of rises and falls in its value in the past.

The risk category does not take into account the following risks of investing in this share class:

Investment Risk: the value of investments held in the Fund and the income from them may rise or fall. The Fund may not achieve its investment objectives.

Concentration of Investments: the Fund endeavours to reduce risk by investing in a range of companies and industry sectors. However, the Fund may be less diversified than other investment products and suffer proportionately higher loss should a particular investment decline in value.

Small Capitalisation Securities: smaller or newer companies are subject to greater risk and reward potential. Investments may be volatile or difficult to buy or sell.

Developing Markets Risk: investing in developing markets exposes the Fund to higher levels of possible risk and return. Developing markets are not always well regulated and may be subject to less developed custody and settlement procedures.

Risks of Investing in Financial Derivative Instruments: the Fund uses specialist financial derivative instruments (FDI) that can multiply gains and losses, thus significantly increasing risk. We aim to reduce this risk by using a robust risk management process that will aim to limit the maximum potential loss. The use of these instruments involves other risks, in particular, counterparty risk, which is the risk to each party to a contract that the other party will not live up to its contractual obligations.

For a more detailed explanation of risks, please refer to the "Risk Factors and Special Considerations" section of the Prospectus.
