

MULTI-ASSET ABSOLUTE RETURN FUND

I Acc ISIN GB00B8113P38

Investment objective

The Fund aims to provide a positive (absolute) return, regardless of market conditions, over any 12 month period. A positive return is not guaranteed over this or any other time period, and particularly over the shorter term the Fund may experience periods of negative returns. Consequently your capital is at risk. Performance target: To outperform the UK Base Interest Rate, after the deduction of charges, over any 3 year period.

For the fund's investment policy, refer to the Additional fund information on page 3.  
**Past performance does not predict future returns.**

## Fees &amp; charges (%)

|                                |      |
|--------------------------------|------|
| Annual management charge (AMC) | 0.50 |
| Estimated ongoing charge (OCF) | 0.96 |

All ongoing charges stated are as per latest published report and accounts.

Fund charges will impact the value of your investment. In particular, the ongoing charges applicable to each fund will dilute investment performance, particularly over time. For further explanation of charges please visit our Fund Charges page at [www.janushenderson.com](http://www.janushenderson.com).

Under some circumstances initial charges may apply. Please refer to the Prospectus for more details.

## Additional fund information

Tax assumptions and reliefs depend upon an investor's particular circumstances and may be subject to change. Fund size at 12pm on last business day of month. Please note: due to rounding the figures in the holdings breakdowns may not add up to 100%. Performance for the share class is calculated at 12pm and performance of the index is calculated as at close of business. Note that any differences among portfolio securities currencies, share class currencies and costs to be paid or represented in currencies other than your home currency will expose you to currency risk. Costs and returns may increase or decrease as a result of currency and exchange rate fluctuations. Investment into the fund will acquire units/shares of the fund itself and not the underlying assets owned by the fund. Cash balances and exposures are based on settled and unsettled trades as at the reporting date. The UK Base Interest Rate is the interest rate set by the Bank of England. It is the performance target of the Fund.

### Investment policy

The Fund invests in a range of asset classes including company shares (also known as equities), bonds and collective investment schemes (other funds including those managed by Janus Henderson) and Exchange Traded Funds. The underlying investments of the collective investment schemes may include shares (equities) of companies, bonds issued by companies and governments, and alternative assets such as property, infrastructure, commodities, private equity and hedge fund type strategies. The Fund may also invest in other transferable securities, cash and money market instruments and derivatives. The Investment Manager may use derivatives (complex financial instruments), including total return swaps, with the aim of making investment gains in line with the Fund's objective, to reduce risk or to manage the Fund more efficiently. The Fund is actively managed with reference to the UK Base Interest Rate as this forms the basis of the Fund's performance target. The Investment Manager has complete discretion to choose investments for the Fund and is not constrained by a benchmark.

### Investment strategy

The Investment Manager seeks to provide investors with a diversified portfolio of assets with an emphasis on 'alternatives' such as hedge fund strategies, property and commodities - as well as traditional assets such as bonds and company shares (equities) - with the overall fund having low or modest correlation to equity and bond markets. The investment team seeks to identify attractive funds by assessing market conditions and conducting due diligence on alternative asset managers. The portfolio will have a significant proportion invested in funds which in their own right seek positive (absolute) returns in varying market conditions.

### Fund specific risks

When the Fund, or a share/unit class, seeks to mitigate exchange rate movements of a currency relative to the base currency (hedge), the hedging strategy itself may positively or negatively impact the value of the Fund due to differences in short-term interest rates between the currencies. The Fund could lose money if a counterparty with which the Fund trades becomes unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider. The Fund invests in other funds (including exchange-traded funds and investment trusts/companies). This may introduce more risky assets, derivative usage and other risks associated with the underlying funds, as well as contributing to a higher level of ongoing charges. The Fund may use derivatives to help achieve its investment objective. This can result in leverage (higher levels of debt), which can magnify an investment outcome. Gains or losses to the Fund may therefore be greater than the cost of the derivative. Derivatives also introduce other risks, in particular, that a derivative counterparty may not meet its contractual obligations. If the Fund holds assets in currencies other than the base currency of the Fund, or you invest in a share/unit class of a different currency to the Fund (unless hedged, i.e. mitigated by taking an offsetting position in a related security), the value of your investment may be impacted by changes in exchange rates. Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

### Source for fund ratings/awards

Overall Morningstar Rating™ is a measure of a fund's risk-adjusted return, relative to similar funds. Fund share classes are rated from 1 to 5 stars, with the best performers receiving 5 stars and the worst performers receiving a single star. Overall Morningstar Rating™ is shown for Janus Henderson share classes achieving a rating of 4 or 5. Ratings should not be taken as a recommendation. For more detailed information about Morningstar Ratings, including its methodology, please go to [www.global.morningstar.com/managerdisclosures](http://www.global.morningstar.com/managerdisclosures). ©2023 FE fundinfo. FE fundinfo shall not be responsible for any trading decisions, damages, or other losses resulting from, or related to, this information, data, analyses, or opinions or their use. FE fundinfo does not guarantee that a fund will perform in line with its FE fundinfo Alpha Manager Rating, FE fundinfo Crown Fund Rating or FE Investments Approved Rating as it is a reflection of past performance only. Likewise, the FE fundinfo Alpha Manager Rating, FE fundinfo Crown Fund Rating and FE Investments Approved Rating should not be seen as any sort of guarantee or assessment of the creditworthiness of a fund or of its underlying securities and should not be used as the sole basis for making any investment decision. For more information visit <https://www.fefundinfo.com>. FE fundinfo Crown Fund Rating is shown for Janus Henderson funds achieving a Crown Fund Rating of 3, 4 or 5.

## Glossary

### Absolute return

The total return of a portfolio, as opposed to its relative return against a benchmark. It is measured as a gain or loss, and stated as a percentage of a portfolio's total value.

### Historic Yield

The Historic Yield reflects distributions declared over the past 12 months as a percentage of the mid-market share price, as at the date shown.

### Standard deviation

A statistic that measures the variation or dispersion of a set of values/data. A low standard deviation shows the values tend to be close to the mean while a high standard deviation indicates the values are more spread out. In terms of valuing investments, standard deviation can provide a gauge of the historical volatility of an investment.
