

# HENDERSON EUROPEAN FOCUS TRUST PLC

## (the “Company”)

### Investment Objective and Policy

#### Investment Objective

The Company seeks to maximise total return (a combination of income and capital growth) from a portfolio of stocks listed in Europe.

#### Investment Policy

##### Asset Allocation

The portfolio is predominantly invested in stocks listed in Continental Europe and has a bias to larger capitalised companies but may, within limits, be invested in the stocks of mid and smaller capitalised companies or in companies listed elsewhere, including UK, providing Continental European exposure.

Stock selection is not constrained by the benchmark and the stock weighting in the portfolio may be materially higher or lower than the weighting of any index used for performance comparisons, including in respect of geographical allocation.

Actual weightings of stocks held in the Company's portfolio are based upon the Manager's views of total return prospects. The portfolio is not constructed with a yield target.

##### Diversification

The portfolio contains between 35 to 45 stocks with a maximum single stock weighting of 10% of net asset value (“NAV”) of the portfolio at the time of investment. Stocks weighted at 5% of the portfolio or more are not expected to exceed 50% of NAV in aggregate. The typical minimum stock weight is 1% of NAV.

Continental European listed stocks will consist of not less than 80 per cent of NAV at the time of investment, with the remaining exposure being in stocks listed elsewhere with exposure to Continental European economies. The exposure to smaller capitalised stocks at the time of investment is limited to 10% of NAV. (Smaller capitalised companies are considered to be those with a market capitalisation of less than €1 billion.)

##### Derivatives

The Company may use financial instruments, known as derivatives, for the purpose of investment and for efficient portfolio management for up to 10% of NAV at the time of entering into the contract.

##### Gearing

The Company can borrow with the aim of achieving a return that is greater than the cost of the borrowing. The Company can borrow up to 20% of net assets at the time the borrowing is assumed.
