Janus Henderson

Multi-Manager Income & Growth Fund Class E Acc ISIN: GB00BJ0LG965

A unit trust, managed by Janus Henderson Fund Management UK Limited.
Fund Currency: GBP Unit Class Currency: GBP

Objective and investment policy

Objective

The Fund aims to provide capital growth, with the potential for some income over the long term.

Performance target: To outperform the IA Mixed Investment 20-60% Shares sector average, after the deduction of charges, over any 5 year period.

Investment policy

The Fund invests in Collective Investment Schemes (other funds including those managed by Janus Henderson and Exchange Traded Funds) to provide diversified exposure to a range of assets including shares (equities) of companies, bonds issued by companies and governments, and to a lesser extent, alternative assets such as property, commodities, private equity and hedge funds. The Fund will invest globally while maintaining a core exposure to UK assets.

The Fund may also invest directly in other assets including developed market government bonds, investment trusts, cash and money market instruments. The Investment Manager may use derivatives (complex financial instruments) to reduce risk or to manage the Fund more efficiently.

The Fund is actively managed with reference to the IA Mixed Investment 20-60% Shares sector average, which is based on a peer group of broadly similar funds, as this forms the basis of the Fund's performance target and limits the level of exposure the Fund may have to company shares. The Investment Manager has a high degree of freedom to choose individual investments for the Fund and to vary allocations between asset types within the constraints of the sector.

Strategy

The Investment Manager believes that asset allocation opportunities are generated by inefficient markets over short term periods and the Fund's asset mix is

actively adjusted to reflect this and to reduce overall risk. The Fund will allocate across regional equities, the entire bond universe, alternative asset classes such as property and commodities and cash in weights cognisant of the peer group. Asset allocation views can be formed on the grounds of fundamental research, asset class valuations, market sentiment, investor positioning, news flow, technical factors and diversification. Investments are implemented primarily through actively managed funds, while passive (index tracking) instruments (primarily ETFs or derivatives) are used for short term tactical trades or for low cost implementation of pure macroeconomic views. The Fund may also hold up to 20% in developed market government bonds.

Distribution policy The Fund offers both accumulation units (units in which net income is retained within the price) and income units (units in which net income is paid out to investors).

Recommendation This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

You can buy, sell or switch units in the Fund on any dealing day and according to certain restrictions, both defined in detail in the Fund's Prospectus.

Risk and reward profile

The value of an investment and any income from it can go up or down. When you sell your units they may be worth less than you paid for them.

The rating above is based on simulated historic volatility. Historic data may not be a reliable indication of the future risk profile of the Fund. The rating is not guaranteed and may change over time.

The unit class appears at 4 out of 7. Units in higher categories have shown greater and/or more frequent variations in Net Asset Value in the past five years than those in lower categories. The lowest category does not mean risk free.

Other material risks not captured by the rating:

Equities Shares/Units can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.

Underlying Funds The Fund invests in other funds (including exchange-traded funds and investment trusts/companies). This may introduce more risky

assets, derivative usage and other risks associated with the underlying funds, as well as contributing to a higher level of ongoing charges.

Derivatives The Fund may use derivatives with the aim of reducing risk or managing the portfolio more efficiently. However this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

Exchange Rates If the Fund holds assets in currencies other than the base currency of the Fund, or you invest in a share/unit class of a different currency to the Fund (unless hedged, i.e. mitigated by taking an offsetting position in a related security), the value of your investment may be impacted by changes in exchange rates.

Liquidity Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

Charges to Capital Some or all of the ongoing charges may be taken from capital, which may erode capital or reduce potential for capital growth.

Counterparty Risk and Operational Risk The Fund could lose money if a counterparty with which the Fund trades becomes unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.

For more information please see the Fund's Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially to those shown in this document.

One-off charges taken before or after you invest*

Entry Charge	5.00%
Exit Charge	0.00%**

* The charges shown are maximum figures. In some cases you may pay less.

** Subject to a charge of up to 3.00% where the Manager suspects excessive trading by an investor (and specifically on subscriptions held for less than 90 days).

Class E Acc (Net of Charges)*

Sector: IA Mixed Investment 20-60% Shares

Charges taken from the Fund over a year

Ongoing Charges	1.46%
-----------------	-------

The ongoing charges are based on estimated annualised expenses for the period ending 23 May 2023. Ongoing charges may vary from year to year. With effect from 11 March 2022 the ongoing charges for this unit class are capped at a maximum of 1.58% per year.

The figure for ongoing charges excludes portfolio transaction costs, except in the case of an initial charge paid by the Fund when buying shares or units in another Fund.

For more information about Charges please see the Fund's Prospectus.

Warning: 11 March 2022. The Fund changed its investment policy. The past performance shown before this change was therefore achieved under circumstances that no longer apply.

The past performance is calculated in GBP.

The Fund was launched in February 1998 and the units were launched in June 2019.

Past performance does not predict future returns.

The past performance takes into account all charges except one-off charges.

*Class E Acc was launched in June 2019. Performance prior to that date is simulated past performance based on the Class A Acc of the same Fund which reflects a different ongoing charge, which is currently capped at 1.58%.
