

## KEY INVESTOR INFORMATION

This document provides you with Key Investor Information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

## Janus Henderson

### Cautious Managed Fund Class E Inc ISIN: GB00BJ0LF553

A sub-fund of Janus Henderson Investment Fund Series II, a UK OEIC managed by Janus Henderson Fund Management UK Limited.

Fund Currency: GBP Share Class Currency: GBP

## Objective and investment policy

### Objective

The Fund aims to provide a return, from a combination of income and capital growth over the long term.

Performance target: To outperform the 50% FTSE All Share + 50% ICE Bank of America Sterling Non Gilt Index by 1.5% per annum, before the deduction of charges, over any 5 year period.

### Investment policy

The Fund invests in shares (also known as equities) and bonds of governments, companies or any other type of issuer, in any country. At all times the investment in equities will be limited to a maximum of 60% of the value of the Fund's portfolio and the Fund will normally have a strong bias towards UK companies and bonds. Companies and bond issuers may be of any size, in any industry. The Fund may also invest in other assets including cash and money market instruments.

The Investment Manager may use derivatives (complex financial instruments) to reduce risk or to manage the Fund more efficiently.

The Fund is actively managed with reference to the 50% FTSE All Share + 50% ICE Bank of America Sterling Non Gilt Index, which is broadly representative of the securities in which it may invest, as this forms the basis of the Fund's performance target. The Investment Manager has a high degree of freedom to choose individual investments for the Fund.

As an additional means of assessing the performance of the Fund, the IA Mixed Investment 20-60% Shares sector average, which is based on a peer group

of broadly similar funds, may also provide a useful comparator. Investors should note that many funds in the sector peer group have a more global focus than the Fund.

### Strategy

The Investment Manager looks to balance the long-term growth and income potential of equities with the more stable returns offered by bonds and cash. The strategy has the flexibility to adjust to changing market conditions by altering the level of exposure to the different asset classes. In managing the equity portion of the portfolio, the Investment Manager will typically follow a value investment style, seeking companies it believes to be undervalued by the market that may be more resilient in periods of economic uncertainty.

**Distribution policy** The Fund offers accumulation shares (shares in which net income is retained within the price) and income shares (shares in which net income may be paid out to investors).

**Recommendation** This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

You can buy, sell or switch shares in the Fund on any dealing day and according to certain restrictions, both defined in detail in the Company's Prospectus.

## Risk and reward profile

The value of an investment and any income from it can go up or down. When you sell your shares they may be worth less than you paid for them.

The rating above is based on simulated historic volatility. Historic data may not be a reliable indication of the future risk profile of the Fund. The rating is not guaranteed and may change over time.

The share class appears at 5 out of 7. Share classes in higher categories have shown greater and/or more frequent variations in Net Asset Value in the past five years than those in lower categories. The lowest category does not mean risk free.

Other material risks not captured by the rating:

**Equities** Shares/Units can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.

**Investment Style - Equities** In respect of the equities portfolio within the Fund, this follows a value investment style that creates a bias towards certain types of companies. This may result in the Fund significantly underperforming or outperforming the wider market.

**Credit Risk** An issuer of a bond (or money market instrument) may become unable or unwilling to pay interest or repay capital to the Fund. If this happens or the market perceives this may happen, the value of the bond will fall.

**Interest Rates** When interest rates rise (or fall), the prices of different securities will be affected differently. In particular, bond values generally fall when interest rates rise (or are expected to rise). This risk is typically greater the longer the maturity of a bond investment.

**Country or Region** If a Fund has a high exposure to a particular country or geographical region it carries a higher level of risk than a Fund which is more broadly diversified.

**Derivatives** The Fund may use derivatives with the aim of reducing risk or managing the portfolio more efficiently. However this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

**Liquidity** Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

**Charges to Capital** Some or all of the ongoing charges may be taken from capital, which may erode capital or reduce potential for capital growth.

**Counterparty Risk and Operational Risk** The Fund could lose money if a counterparty with which the Fund trades becomes unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially to those shown in this document.

### One-off charges taken before or after you invest\*

Entry Charge	5.00%
Exit Charge	0.00%**

\* The charges shown are maximum figures. In some cases you may pay less.

\*\* Subject to a charge of up to 3.00% where the Manager suspects excessive trading by an investor (and specifically on subscriptions held for less than 90 days).

## Past performance

### Charges taken from the Fund over a year

Ongoing Charges	0.90%
-----------------	-------

Following recent changes to the GAC ("General Administration Charge"), an estimated OCF has been calculated which is more indicative of future costs.

The figure for ongoing charges excludes portfolio transaction costs, except in the case of an initial charge paid by the Fund when buying shares or units in another Fund.

For more information about Charges please see the Company's Prospectus.

**\*\*Warning:** From 1 July 2020, the Fund's benchmark changed from 50% FTSE All Share + 50% ICE Bank of America ML 5-15 Year Sterling Non Gilt Index to 50% FTSE All Share + 50% ICE Bank of America ML Sterling Non Gilt Index. Past performance before 1 July 2020 is shown for the Fund's previous benchmark.

The past performance is calculated in GBP.

The Fund was launched in February 2003 and the share class was launched in June 2019.

Past performance does not predict future returns.

The past performance takes into account all charges except one-off charges. Please note that while the Fund aims to achieve its performance target before the deduction of charges, the chart and table illustrate the actual performance of the share class after the deduction of charges.

The Fund does not aim to track the performance of the benchmark.

\*Class E Inc was launched in June 2019. Performance prior to that date is simulated past performance based on the Class A Inc of the same Fund which reflects a different ongoing charge, which is currently estimated at 1.40%.
