Who we are

At Janus Henderson our mission is to help clients define and achieve superior financial outcomes through differentiated insights, disciplined investments, and world-class service. This means being ever mindful of the futures of the millions of lives that our thinking and our investments help shape. Our diverse client base and robust balance sheet allow us to offer financial strength and stability with which to help investors achieve their objectives.

The human connection matters in all that we do. Teams across Janus Henderson come together every day to deliver outcomes for our clients – and their clients – that make a difference. We are proud of this responsibility as we fulfil our purpose of 'Investing in a brighter future together'. The goals we set, the strategy we create, and the way that we work are all shaped with this ultimate objective in mind.

Why us

Choosing Janus Henderson means benefiting from:

Differentiated insights

- We are proud of our deep-rooted research culture, which has underpinned our 89-year track record of investing.
- Janus Henderson's investment teams meet thousands of companies each year. Insight from these meetings combined with proprietary analysis results in original views that shape our investment positioning.
- With 340 investment professionals around the world, we benefit from a range of perspectives that we test and share as we seek to differentiate between the winners and losers on behalf of our clients.

Disciplined investments

- Our investment teams set clearly defined objectives and processes to deliver long-term risk-adjusted returns. We value the trust clients place in us and are disciplined in staying true to our investment style through all market conditions.
- We apply robust controls to ensure that risk taken is in accordance with client expectations and investment manager expectations. We have more than 150 experts in our risk and compliance teams.

World class service

- We offer global reach with our broad network of investment and client service specialists. This is combined with the responsiveness, tailored solutions, and personal touch of a local partner.
- Understanding the challenges our clients – and their clients – face globally, and working in partnership, means we can provide support as we blend our best ideas and capabilities to define appropriate tailored outcomes.
- We seek to contribute to clients' understanding and decision-making – we share knowledge through published insights, at events, and by actively participating in debate on the future of investing.

Authorised Fund Manager's report for the six months ended 31 December 2023

We are pleased to present the Interim Report & Accounts for Janus Henderson Multi-Manager Global Select Fund (the 'fund') for the six months ended 31 December 2023.

Authorised status

The fund is an authorised unit trust scheme and is a United Kingdom Alternative Investment Fund (UK AIF) under the UK Alternative Investment Fund Manager (UK AIFM) Regulations 2013, as amended by the AIFM (EU Exit) Regulations 2019, authorised as a non-Undertakings for Collective Investment in Transferable Securities (non-UCITS) retail scheme for the purposes of the Financial Conduct Authority (FCA) rules, complying with chapter 5 of the Collective Investment Schemes Sourcebook (COLL). The operation of the scheme is governed by the Trust Deed, COLL and Prospectus. The Trustee is also the Depositary for the purposes of the UK AIFM Regulations 2013, as amended by the AIFM (EU Exit) Regulations 2019, pursuant to a depositary agreement dated 22 July 2014.

The fund was established on 10 July 2006 and authorised by the FCA on 13 July 2006.

Unitholders are not liable for the debts of the fund.

Statement of Authorised Fund Manager's responsibilities

The FCA's COLL requires the Authorised Fund Manager (AFM) to prepare financial statements for each annual accounting year and interim accounting period, which give a true and fair view, in accordance with the Statement of Recommended Practice (SORP) for Authorised Funds issued by the Investment Management Association (IMA) in May 2014 and amended in June 2017, UK Generally Accepted Accounting Practice (UK GAAP) (UK Accounting Standards, comprising the Financial Reporting Standard 102 (FRS 102) applicable in the UK and Republic of Ireland), of the financial affairs of the fund and of its revenue/expenditure for the period. The AFM is responsible for the management of the fund in accordance with its Trust Deed, Prospectus and the Regulations. The AFM is also responsible for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Value assessment

The board of Janus Henderson Fund Management UK Limited (JHFMUKL) present the value assessment report for the period to 31 December 2022, made available on our website www.janushenderson.com.

Access by this link (<https://www.janushenderson.com/en-gb/investor/notice/value-assessment-report>).

The FCA, the UK's financial services regulator, requires all fund management groups to perform a detailed assessment of whether funds are providing value to investors, and publish an annual statement summarising the outcome of this process, known as the value assessment. Our report is published by JHFMUKL, the Board of the AFM (the body responsible for an investment fund) and summarises the period to 31 December 2022. For the period to 31 December 2023, the report is expected to be published on our website at the end of April 2024.

The value assessment considers a minimum of seven criteria set by the FCA. While investment performance and quality of service are clearly important factors, costs and charges paid by investors are also key considerations. At Janus Henderson, ensuring value is delivered to investors has always been central to our process and therefore the value assessment is an extension to the existing ongoing monitoring processes that provide oversight of how the funds are managed.

The report contains an overview of the process that Janus Henderson undertook to perform this assessment along with the conclusions.

Macro risks

The Investment Manager continues to monitor closely macro risks, including geopolitical risks, such as the ongoing impact of the Russia/Ukraine conflict and the conflict in the Middle East, market risks, such as stresses in the banking sector and the higher inflationary and interest rate environment. We have established processes to be able to respond timely to changes. We have well-established and tested business continuity and crisis management processes in place, which cover a large number of disruptive scenarios, including cyber threats and market events. The Investment Manager also has embedded market risk monitoring processes, including modelling potential stressed market scenarios, to help inform our investment decisions.

Investment Fund Managers

Tihana Ibrahimasic, James de Bunsen and Peter Webster

Please note that from 7 July 2023, Paul O'Connor no longer manages this fund. James de Bunsen and Peter Webster now co-manage this fund with Tihana Ibrahimasic.

Investment objective and policy

The fund aims to provide capital growth over the long term.

Performance target: To outperform the IA Global Sector average, after the deduction of charges, over any 5 year period.

The fund invests in Collective Investment Schemes (other funds including those managed by Janus Henderson and Exchange Traded Funds (ETFs)) to provide diversified global exposure to a range of assets including shares (equities) of companies, bonds issued by companies and governments, and to a lesser extent, alternative assets such as property, commodities, private equity and hedge funds.

The fund may also invest directly in other assets including developed market government bonds, investment trusts, cash and money market instruments. The Investment Manager may use derivatives (complex financial instruments) to reduce risk or to manage the fund more efficiently.

The fund is actively managed with reference to the IA Global Sector average, which is based on a peer group of broadly similar funds, as this forms the basis of the fund's performance target. The Investment Manager has complete discretion to choose investments for the fund and is not constrained by a benchmark.

Strategy

The Investment Manager believes that asset allocation opportunities are generated by inefficient markets over short term periods and the fund's asset mix is actively adjusted to reflect this and to reduce overall risk. The fund will allocate across regional equities, the entire bond universe, alternative asset classes such as property and commodities and cash in weights cognisant of the benchmark index. Asset allocation views can be formed on the grounds of fundamental research, asset class valuations, market sentiment, investor positioning, news flow, technical factors and diversification. Investments are implemented primarily through actively managed funds, while passive (index tracking) instruments (primarily ETFs or derivatives) are used for short term tactical trades or for low cost implementation of pure macroeconomic views. The fund may also hold up to 20% in developed market government bonds.

Performance summary

Cumulative performance

	Six months	One year	Three years	Five years	Since inception
	30 Jun 23 - 31 Dec 23	31 Dec 22 - 31 Dec 23	31 Dec 20 - 31 Dec 23	31 Dec 18 - 31 Dec 23	30 Jul 87 - 31 Dec 23

Performance summary (continued)

Benchmark usage:

Peer group: IA Global Sector

Peer group usage: Target

Peer group description: The Investment Association (IA) groups funds with similar geographic and/or investment remit into sectors. The fund's ranking within the sector (as calculated by a number of data providers) forms the basis of the fund's performance target.

Past performance does not predict future returns. The value of an investment and the revenue from it can fall as well as rise as a result of market and currency fluctuations and you may not get back the amount originally invested.

Investment review

The fund returned 6.1% based on Class I accumulation (Net) over the period under review, compared with a return of 5.7% in the IA Global Sector peer group benchmark.

Global equities, as measured by the MSCI World Index, increased by 7.5% in sterling and 7.8% in US dollar terms during the reporting period as inflation cooled and major central banks appeared to reach the end of their interest rate hiking campaigns. Markets surged in November – global equity benchmark the MSCI ACWI Index achieved its best monthly performance in three years – and again in December, as investors grew increasingly hopeful that policy makers would cut rates in 2024. However, bouts of uncertainty regarding the direction of monetary policy and anxiety about a global economic downturn dampened sentiment during the period.

The period was strong for riskier assets, and the fund's equity portfolio contributed positively to performance, while the cash allocation was also beneficial.

The North American equity allocation delivered the strongest positive contribution followed by European equities excluding the UK. The allocations to global equities and UK equities also generated positive returns. In contrast, there were negative contributions from global emerging markets and Japanese equities.

At the position level, top performers included the iShares Edge MSCI USA Quality Factor UCITS ETF, the Janus Henderson US Forty Fund and the GQG Partners US Equity Fund. Positions in S&P 500, NASDAQ and Euro STOXX index futures also benefited returns. The main detractors included the First Sentier All China Fund, the First Sentier Japan Equity Fund and Hang Seng China Enterprises Index futures. Elsewhere, foreign exchange positions and cash contributed positively overall, largely due to positioning in the US dollar, which weakened during the period.

The futures position in the Hang Seng China Enterprises Index was closed. A new position was opened in the WS Gresham House UK Multi Cap Income Fund, which was funded by a reduction in the US equity allocation. To reduce volatility and add defensiveness to the portfolio, we initiated a holding in the iShares Edge MSCI USA Minimum Volatility ESG UCITS ETF. Towards the end of the period, we trimmed several positions within equities, taking profits in holdings that had performed relatively well following the market rally.

Following the surge in equities in the late stages of 2023, we think markets look somewhat stretched as we enter 2024. Sentiment and positioning indicators suggest high levels of optimism among investors and a degree of overextension in many moves. A lot of the enthusiasm appears to be based on the increasingly dovish outlook for interest rates, with the US Federal Reserve and the European Central Bank expected to start cutting rates in the second quarter. Inflation is expected to drop below 3% by then, further reducing the pressure on central banks to keep policy as restrictive as it is now.

The most important issue remains around economic resilience. GDP growth is likely to slow in 2024, with the US economy expected to expand by less than 1% and the eurozone by less than 0.5%. While the eurozone has continued to show worrying signs, the US economy has remained relatively durable in the face of significant and rapid increases in interest rates.

With markets already expecting a very dovish outcome, it has become increasingly difficult to see where positive catalysts are likely to come from in the near term. Better-than-expected economic growth outcomes may delay interest rate cuts and weigh on valuations, although weaker data may raise the spectre of an economic 'hard landing', which has yet to be definitively averted. As a result, the fund remains somewhat cautious and well diversified, as we continue to look out for better entry points for new investment opportunities.

References made to individual securities do not constitute a recommendation to buy, sell or hold any security, investment strategy or market sector, and should not be assumed to be profitable. Janus Henderson Investors, its affiliated advisor, or its employees, may have a position in the securities mentioned.

Lowest unit price (pence)	225.50	213.30	212.50	181.70

Direct transaction costs incurred on securities transactions (including derivatives) are stated after deducting the proportion of the amounts collected from dilution adjustments that relate to direct transaction costs.

Performance values are at close of business on a bid basis, which will differ from those in the Performance summary.

Operating charges

Operating charges are expenses associated with the maintenance and administration of the fund on a day-to-day basis that are actually borne by the unit class.

Unit class launches and closures

There were no unit classes launched or closed during the period.

Ongoing charge figure

The annualised ongoing charge figure (OCF) of the fund is calculated as the ratio of the total ongoing charges to the average net asset value for twelve months. Ongoing charges are all expenses deducted from the assets of the fund during the period, except for expenses that are explicitly excluded by regulation.

	31/12/23	30/06/23
	%	%
Accumulation units	1.74	1.74
Class E accumulation	1.24	1.24
Class I accumulation	1.04	1.04

The OCF includes a synthetic element of 0.30% (30/06/23: 0.30%) to incorporate the OCF of underlying funds.

The OCF is calculated in accordance with guidelines issued by the European Securities and Markets Authority (ESMA).

Although this fund is a non-UCITS, we have used this disclosure to enable comparison across our fund range.

Risk and reward profile

The fund currently has 3 types of unit class in issue: Accumulation, Class E accumulation and Class I accumulation.

Each unit class has the same risk and reward profile which is as follows:

The unit classes appear at 5 out of 7. Units in higher categories have shown greater and/or more frequent variations in Net Asset Value in the past five years than those in lower categories. The lowest category does not mean risk free.

The Synthetic Risk and Reward Indicator (SRRI) is calculated based on historical volatility over a rolling five* year period, it is reviewed monthly and updated if volatility has changed materially to cause a movement in the SRRI level. The SRRI is an indicator and may not accurately reflect future volatility and market conditions.

The value of an investment and any income from it can go up or down. When you sell your units they may be worth less than you paid for them.

The rating above is based on the historic volatility of the unit classes. Historic data may not be a reliable indication of the future risk profile of the fund. The rating is not guaranteed and may change over time.

Other material risks not captured by the rating:

Counterparty Risk and Operational Risk The fund could lose money if a counterparty with which the fund trades becomes unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.

Derivatives The fund may use derivatives with the aim of reducing risk or managing the portfolio more efficiently. However this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

Equities Shares/Units can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.

Exchange Rates If the fund holds assets in currencies other than the base currency of the fund or you invest in a share/unit class of a different currency to the fund (unless hedged, i.e. mitigated by taking an offsetting position in a related security), the value of your investment may be impacted by changes in exchange rates.

Liquidity Securities within the fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

Underlying Funds The fund invests in other funds (including exchange-traded funds and investment trusts/companies). This may introduce more risky assets, derivative usage and other risks associated with the underlying funds, as well as contributing to a higher level of ongoing charges.

The full list of the fund's risks are contained in the 'Risk Warnings' section of the fund's prospectus.

There has been no change to the risk rating during the period.

The SRRI conforms to the ESMA guidelines for the calculation of the SRRI.

* Class E accumulation launched on 24 June 2019 and as it does not have a five year history, a synthetic history has been created using the Accumulation unit class.

Notes to the financial statements for the six months ended 31 December 2023

Accounting policies

Basis of preparation

The interim financial statements have been prepared under the historical cost basis, as modified by the revaluation of investments, and in accordance with the SORP for UK Authorised Funds issued by the IMA in May 2014 and amended in June 2017, FRS 102, the FCA's COLL, the Trust Deed and Prospectus. The financial statements have been prepared on a going concern basis.

The accounting policies, distribution policy and potential risks are consistent with those of the financial statements for the year ended 30 June 2023 and are described in those annual accounts.
