## Janus Henderson Horizon Fund

### Global Multi-Asset Fund Class A2 HEUR ISIN: LU1253842006

A sub-fund of Janus Henderson Horizon Fund, a Luxembourg SICAV managed by Janus Henderson Investors Europe S.A.

Fund Currency: GBP Share Class Currency: EUR

## Objective and investment policy

### Objective

The Fund aims to provide a return, from a combination of capital growth and income, with volatility lower than that of equity market volatility, over the long term.

Performance target: To outperform the SONIA by 4% per annum, before the deduction of charges, over any 5 year period.

### Investment policy

The Fund invests in Collective Investment Schemes (other funds including those managed by Janus Henderson and Exchange Traded Funds) to provide diversified global exposure to a range of assets including shares (equities) of companies, bonds issued by companies and governments, and to a lesser extent, alternative assets such as property and commodities.

The Fund may also invest in other assets including shares (equities), bonds, cash and money market instruments.

The investment manager may use derivatives (complex financial instruments) to reduce risk or to manage the Fund more efficiently.

The Fund is actively managed with reference to the SONIA, as this forms the basis of the Fund's performance target. For currency hedged Share Classes, the rate that corresponds with the relevant Share Class currency is used as the basis of the performance comparison. The investment manager has complete discretion to choose investments for the Fund.

### Strategy

The investment manager follows a strategy that combines strategic asset allocation (based on long-term return, risk and correlation expectations of various asset classes), dynamic asset allocation (giving the strategy the flexibility to reflect the team's shorter term market views and to react quickly in times of market stress), and careful underlying fund and instrument selection. The investment process is underpinned by a robust, multi-faceted approach to risk management. The strategy results in a portfolio with exposure to a wide variety of asset classes, both traditional and alternative, in the expectation that investors will benefit from the significant diversification benefits multi-asset investing provides.

**Distribution policy** This share class accumulates income which is retained within the price of the share class.

**Recommendation** This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

You can buy, sell or switch shares in the Fund on any dealing day, as defined in the Company's Prospectus.

## Risk and reward profile

The value of an investment and any income from it can go up or down. When you sell your shares they may be worth less than you paid for them.

The rating above is based on the historic volatility of the share class. Historic data may not be a reliable indication of the future risk profile of the Fund. The rating is not guaranteed and may change over time.

The share class appears at 4 out of 7. Share classes in higher categories have shown greater and/or more frequent variations in Net Asset Value in the past five years than those in lower categories. The lowest category does not mean risk free.

Other material risks not captured by the rating:

**Equities** Shares/Units can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.

**Underlying Funds** The Fund invests in other funds (including exchange-traded funds and investment trusts/companies). This may introduce more risky assets, derivative usage and other risks associated with the underlying funds, as well as contributing to a higher level of ongoing charges.

**Derivatives and Leverage** The Fund may use derivatives to help achieve its investment objective. This can result in leverage (higher levels of debt), which can magnify an investment outcome. Gains or losses to the Fund may therefore be greater than the cost of the derivative. Derivatives also introduce other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

**Exchange Rates** If the Fund holds assets in currencies other than the base currency of the Fund, or you invest in a share/unit class of a different currency to the Fund (unless hedged, i.e. mitigated by taking an offsetting position in a related security), the value of your investment may be impacted by changes in exchange rates.

**Currency Hedging** When the Fund, or a share/unit class, seeks to mitigate exchange rate movements of a currency relative to the base currency (hedge), the hedging strategy itself may positively or negatively impact the value of the Fund due to differences in short-term interest rates between the currencies.

**Liquidity** Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

**Counterparty Risk and Operational Risk** The Fund could lose money if a counterparty with which the Fund trades becomes unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.

For more information please see the Company's Prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially to those shown in this document.

### One-off charges taken before or after you invest\*

Entry Charge	5.00%
Exit Charge	0.00%**

\* The charges shown are maximum figures. In some cases you may pay less.

\*\* Subject to a charge of up to 1.00% where the Manager suspects excessive trading by an investor (and specifically on subscriptions held for less than 90 days).

## Past performance

Performance (%)										
				6.4	5.3	-5.7	9.3	8.2	5.2	-10.8

■ Class A2 HEUR (Net of Charges)

■ €STR +4% per annum\*

### Charges taken from the Fund over a year

Ongoing Charges	1.56%
-----------------	-------

The ongoing charges are based on actual annualised expenses for the period ending 30 June 2022. Ongoing charges may vary from year to year.

The figure for ongoing charges excludes portfolio transaction costs, except in the case of an initial charge paid by the Fund when buying shares or units in another Fund.

For more information about Charges please see the Company's Prospectus.

\*Warning: From 6 April 2021, the share class benchmark changed from 3 Month EUR Euribor Interest Rate to Euro Short Term Rate. Past performance before 6 April 2021 is shown for the previous share class benchmark.

The past performance is calculated in EUR.

The Fund and the share class were launched in July 2015.

Past performance does not predict future returns.

The past performance takes into account all charges except one-off charges.

The Fund does not aim to track the performance of the benchmark.

Please note that while the Fund aims to achieve its performance target before the deduction of charges, the chart and table illustrate the actual performance of the share class after the deduction of charges.
